Split Video into Several Clips

1. Open a video on the Main Page
2. Tap the “Edit” – Button

The Clip – Screen will open:

1. Tap the “Play” – Button to play the video
2. Tap the “Clip Start” – Button when the start point of your clip is reached. The player will stop automatically
3. Tap the “Play” – Button again to continue to play the video
4. Tap the “Clip End” – Button when the end point of your clip is reached. The player will stop automatically
5. Tap the “Add” – Button. The Clip will be added to the Clip list

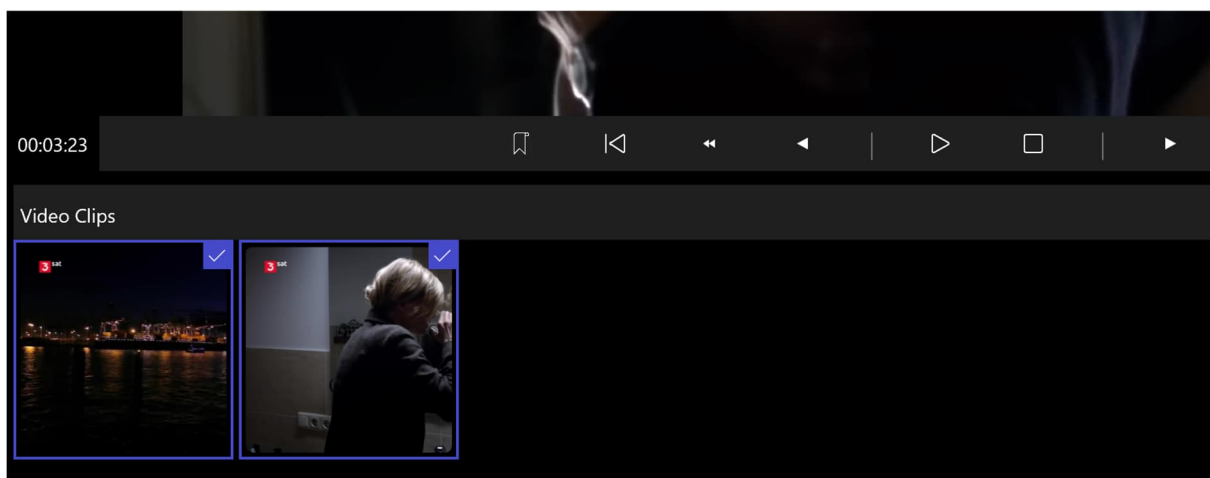

Or

Real Free Video Converter - Guide

1. Tap the "Forward" or "Fast Forward" – Button until the desired start scene is reached. Tap the "Forward" or "Fast Forward" – Button again to stop the player
2. Tap the "Clip Start" – Button
3. Tap the "Forward" or "Fast Forward" – Button until the desired end scene is reached. Tap the "Forward" or "Fast Forward" – Button again to stop the player
4. Tap the "Clip End" – Button
5. Tap the "Add" – Button. The Clip will be added to the Clip list

Note: You can always use the "Forward/Fast Forward" and "Backwards/Fast Backward" – Buttons to fine tune the clip start and end.

Select all clips you want to convert from the clip list
